

FOR A SIMPLER LIFE

Make Money Selling Ice Cream!

Full-time or part-time – Get the whole family involved

Make extra money working weekends and evenings or use our ice cream freezers and trailers to stay busy with a fun and rewarding full-time job. It won't take long before your business becomes well known in the community and you will start turning a profit. And the best part is, it's something the whole family can do.

Every fair, family gathering, sale or special event is an opportunity to allow hundreds of people to indulge in one of the most delicious treats imaginable – homemade ice cream. At \$2.00 for a small serving or \$3.00 for a large serving, it doesn't take long to make the day worth your while.

We've seen it happen

A local friend of ours makes ice cream outside of Lehman's store in Kidron, Ohio during the summer. He also goes to fairs, auctions and other special events. While the distinctive thug-thug-thug of his hit-and-miss John Deere engine draws curious people from Lehman's parking lot and the adjacent flea market, many of these curious onlookers become customers when they watch him making this delectable treat. His wife and three children help him make and serve the ice cream as they work in the family business together.

All you need is our trailer with one or two 5-gallon freezers and you are in business. Make the traditional vanilla and chocolate flavors or get creative. Our local friend also makes strawberry, butter pecan and vanilla with Reese's Cups.

On a hot, summer day with hundreds of people around, it is not uncommon to sell 10-20 freezers full of ice cream. With about 50 small servings per freezer, you can take in up to \$2,000 a day.

Comes with all this

Our complete system comes with one or two 5-gallon ice cream freezers, a hit-and-miss 1 1/2 horsepower John Deere engine (3 horsepower available on double units) with all the appropriate belts and pulleys, all on a fiberglass trailer. You choose whether you want easy-rolling solid rubber wheels or more authentic wooden spoke wheels (*pictured at right*). Crating for shipment by freight is available but the most economical method of getting one of our units is by picking it up here. Call ahead to order one of these since we don't always have them in stock at our store. All units are assembled locally in an Amish business.

As your business grows...

To start out, you can get by with a minimal amount of extra equipment but as your business grows you will have to add to your outfit so you can more efficiently serve your customers. You will need a large cooler for storing ice, a gas or electric freezer for keeping the finished ice cream frozen, a refrigerator

for keeping the ingredients cold, and, if you started out with only one ice cream freezer, you will probably need to add another one to your trailer. The only way to ensure a continuous supply of ice cream at big events is to use more than one ice cream freezer. Almost every successful operator eventually adds additional ice cream freezers sooner or later.

Choose from these options

Several options are available.

Pick the one that is right for your situation:

#42-278 One 5-gallon freezer, 1 1/2 hp John Deere engine, fiberglass trailer with solid rubber wheels. 80”Lx36”Wx52”H, 450 lb.
